Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 recites the limitation "the combination" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the bolted joints" in lines 10-11. There is insufficient antecedent basis for this limitation in the claim.

Claim 2 recites the limitation "the resulting combination" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 2 recites the limitation "the form" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 includes various component numbers but does not particularly disclose the limitations of the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3635

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 3,810,337 to Pollard. Pollard discloses a structural member comprised of a plastic core (fig. 1: 38) having embedded reinforcing rods (fig. 1: 26) and metal end plates (fig. 1: 20).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The cited patents listed on the included form PTO-892 further show the state of the art with respect to embedded structural members in general.
